

Project Design Phase-II

Data Flow Diagram & User Stories

Date	14 July 2026
Team ID	SWTID-2026-2149
Project Name	Credit card approval prediction
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example

Flow chart:

Level-0 (Context Diagram)

| Credit Card Approval Prediction |

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer	Enter Applicant Details	USN-1	As a user, I can enter my personal and financial details.	User can successfully submit details.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer	Data Validation	USN-2	As a user, I should receive an error if required fields are empty or invalid.	Validation messages are displayed correctly.	High	Sprint-1
Customer	Credit Card Prediction	USN-3	As a user, I can predict whether my credit card application will be approved.	Prediction result is displayed successfully.	High	Sprint-2
Customer	View result	USN-4	As a user, I can view the approval or rejection result.	Result is displayed clearly.	Medium	Sprint-2
Administrator	Data set management	USN-5	As an administrator, I can update the dataset for model training.	Dataset is updated successfully.	Medium	Sprint-3
Administrator	Model Training	USN-6	As an administrator, I can train the ML model with new data.	Model is trained successfully.	High	Sprint-3
Administrator	System Testing	USN-7	As an administrator, I can test the prediction model.	Model produces accurate predictions.	High	Sprint-4
Administrator	Deployment	USN-8	As an administrator, I can deploy the prediction system.	System is available for users.	Medium	Sprint-4
