

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	14 July 2026
Team ID	SWTID-2026-2149
Project Name	Credit card approval prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Input	1.Enter applicant details (Age, Income, Employment Status, Credit History, etc.) 2.Validate the entered data before prediction.
FR-2	Credit Card Approval Prediction	1.Process the input using the trained Machine Learning model. 2.Display whether the application is Approved or Rejected.
FR-3	Prediction Result	1.Show the prediction result clearly to the user. 2.Allow the user to enter new details for another prediction.
FR-4	Model Management	1.Train the ML model using the dataset. 2.Save and load the trained model for future predictions.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should be simple and easy to use for all users.
NFR-2	Security	User data should be stored and processed securely.
NFR-3	Reliability	The system should provide accurate and consistent prediction results.

NFR-4	Performance	The prediction should be generated within a few seconds.
NFR-5	Availability	The system should be available whenever users need to access it.
NFR-6	Scalability	The system should support more users and larger datasets in the future.
