Problem – Solution Fit Template

Date	14 July 2026
Team ID	SWTID-2026-2149
Project Name	Credit card approval prediction
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem–Solution Fit explains how the proposed solution solves the customer’s problem. In the Credit Card Approval Prediction project, customers and banks face delays, manual verification, and inconsistent decisions during the credit card approval process. The proposed AI and Machine Learning solution analyzes applicant information and predicts approval or rejection quickly and accurately. This reduces processing time, improves decision-making, and increases customer satisfaction.

Purpose:

- *Identify the main problems faced by customers and banks.
- *Provide a fast and accurate AI-based credit card approval system.
- *Reduce manual work and human errors.
- *Improve customer satisfaction through quicker decisions.
- *Help banks process more applications efficiently.
- *Build trust by providing fair and consistent approval decisions.**
