

Project Design Phase
Proposed Solution Template

Date	14 July 2026
Team ID	SWTID-2026-2149
Project Name	Credit card approval prediction
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Banks take time to approve credit card applications, and manual checking can lead to mistakes. This project helps predict whether a credit card application should be approved.
2.	Idea / Solution description	We use AI and Machine Learning to analyze customer details like income, age, job, and credit history to predict credit card approval.
3.	Novelty / Uniqueness	The system gives quick and accurate predictions, reduces human errors, and helps make fair decisions.
4.	Social Impact / Customer Satisfaction	Customers get faster approval decisions, and banks can improve their services with accurate results.
5.	Business Model (Revenue Model)	Banks and financial companies can use this system by paying a subscription or software license fee.
6.	Scalability of the Solution	The system can be used by many banks and can also be extended for loan approval and fraud detection in the future.
